as in a one-off unit so you're
investing in a superior unit
of incredible value

NO WAITING, NO DELAYS

Comprehensive range of
spare parts are readily
available so we can get you
back up and cooking fast

FEATURES AND SPECIFICATIONS

The Mount Forge Spit Roaster catering system is a fantastic entertaining and potentially profitable way of feeding up to 200 people. It is a great looking catering appliance that will become the focus of any event and give many years of reliable service.

- Superior product constructed in 443 stainless steel offering scientifically proven corrosion resistance properties of 304 - and significantly superior to commonly used 430 stainless steel
- Purpose built, designed, tooled and engineered to the highest specification, not crudely custom built. High levels of fit and finish and modern design are engineered into the product.
- Highest quality components and hardware included, no shortcuts taken by Mount Forge here
- Simple, minimal assembly required – just attach the wheels & castors, attach the motor & mounting bracket, spit rod stands, and add desired attachment to the spit rod, clean and you're ready to cook
- The motor is rated for up to 70kg loads - roast hogs or sheep on the 25mm solid stainless steel spit or 20 - 25 chickens or rolled roasts using the stainless steel roasting cradle attachment – easy and with ultimate control
- Grunty 30 watt, 240V, 1rpm motor capable of dealing with the big jobs
- Unique quick release and attach system – spit-shaft to motor

■ **Comes with all accessories included:**

- 4 basket stainless steel roasting cradle for cooking chooks or other fowl, small roasts, rolled roasts or vegetables
- 25mm solid stainless steel spit shaft for the big jobs and for attaching roasting cradle
- To secure up to an 70kg beast, two prongs, neck brace, front leg brace and rear leg brace
- 4 stainless steel bain-marie trays for carving into, keeping the meat and stuffing warm or cooking vegetables etc whilst cooking the meat either with the lid open or closed

■ Unique 4 position carving mounts positioned at a comfortable carving height

■ Twin skin double-walled construction for strength and heat insulation

■ The bottom of the oven is tapered so excess fat runs towards the drain hole where it can be collected in the removable drip pan during cooking, reducing the risk of flare up and excessive smoke

■ Smart design ensures very simple clean up after use

■ Comes with high capacity regulator and hose assembly included

■ Heavy duty castors and wheel for easy movement and manoeuvrability and slim enough to go through standard doorways. Features a handle at one end so the oven can be easily wheeled into place by one person

■ CE approved and suitable for NZ conditions

■ Powerful but economical twin burner system with individual temperature management delivers ultimate control

■ Burner covers prevent fat from blocking the burner holes

■ Electronic ignition for fail safe lighting every time

■ Features an accurate temperature gauge

■ Spare parts back up inventory held by New Zealand agent with 30 years experience in the NZ gas industry

■ Build quality and use of quality materials ensures that the Mount Forge Spit Roaster will retain a strong resale value

Internal dimensions: 1364 x 602 x 626mm (L x W x H) with lid closed

External dimensions: 2060 x 680 x 965mm (L x W x H)
